

TrustBox Mute

The TrustBox Mute prevents possible eavesdropping on conversations by your cellphone while remaining visibly accessible.

When your mobile phone is inside of the TrustBox Mute your conversations are protected against eavesdropping.

When you are working in a highly confidential environment absolute privacy is needed but also still being available to receive incoming calls and messages. The TrustBox Mute is your solution. Feel confident to have any conversation without having to worry about malicious actors listening in on confidential conversations.

PROTECT YOURSELF FROM

-  Eavesdropping
-  Theft
-  Data loss
-  Unavailability

THE TRUSTBOX MUTE CREATES PRIVACY

Our TrustBox Mute is unique in its form and function. Scalys provides the only solution when it comes to portable sonic eavesdropping prevention. Offering the following functionality in a pocket-size device:

- 100% true random hardware generated noise
- 40 hours of private conversation on a full battery
- Easily operated with one hand
- Wireless charging of your cell phone
- USB-C connectivity
- 3 Privacy volume settings
- Rigid and durable casing

PRIVACY WITH FULL AVAILABILITY

Full communicative availability is requested more and more often. However, not in all situations this is desirable. Not every context allows a mobile communication device to be close to you. The TrustBox Mute makes this possible.
